PROFESSIONAL EXPERIENCE

Information technology support| Illinois State University –Normal, IL

AUGUST 2021 – JUNE 2022

Responsibilities included administrating a database of parking permits for automobiles owned by customers and employees of the university.

- I created Sql queries that facilitated the deletion of customer duplicate data that were unnecessarily occupying disk space, which allowed my department to not to have to pay for the disk space that was being occupied by useless data. Furthermore, the deletion of duplicates still allows customer representatives work more efficiently.
